

◇ XProtect Express

Affordable surveillance with video integration

XProtect Express is affordable video surveillance software for small businesses that need to integrate video into their existing surveillance and security operations. With support for integration capabilities, businesses can create a surveillance solution with custom functionality by adding applications such as video analytics and access control, making XProtect Express ideal for customers that need more than just a surveillance system. The automatic configuration wizard removes time delays and challenges during initial deployment making it easier than ever to set up.

◇ Increase functionality

Integrate add-on products and third-party solutions, including access control, video analytics and building management systems to create one comprehensive surveillance solution with increased functionality and one common interface.

◇ Access anywhere

XProtect Express is compatible with all three XProtect clients, giving users access to their video surveillance system from anywhere at any time.

◇ Situational awareness

With simple and efficient video search tools and multiple export options, users can quickly gather and share evidence when needed.

Restaurants

XProtect software can be used to protect guests and keep track of employees handling cash. Managers can remotely assist employees and help solve issues by accessing XProtect surveillance using a smartphone or tablet.

What's new in 2014

One-layer interactive map

XProtect Smart Client users get a graphical overview of the entire installation providing visual assistance to identify and navigate through different cameras and views. Users of all skill levels can easily locate and process video recordings using the intuitive map feature.

Update notifications

Users are automatically notified about new software versions, ensuring they are always aware of the latest product updates, capabilities and bug fixes.

Easy to deploy

All XProtect Professional VMS Products use the same installer, which simplifies the deployment process.

Simple upgrade

New licensing flow significantly reduces steps and time involved when upgrading to a more advanced Milestone solution and when updating the VMS to the latest version available.

Support for generic events

Enables easy and fast integration of third-party applications and systems via a simple message-based socket communications interface.

Automatic motion detection adjustment

Adjusts the sensitivity level to optimize motion detection for background noise levels in the video stream.

Did you know?

Some of our many retail customers use XProtect for inventory management by combining electronic label scanning with the software to easily see if products are in the warehouse or on store shelves.
